GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA  
There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

S 2104

A. Name of person diverting water..... A. P. Bressiani  
Address..... Route 1, Box 36 Quincy, California

B. Name of body of water at point of diversion..... Mill Creek  
Tributary to..... Spanish Creek

C. Place of diversion NE  $\frac{1}{4}$  NE  $\frac{1}{4}$  Section 12, Township: 24N, Range 9E, MD East  
Plumas County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works..... Mill Creek Diversion No. 3

E. Capacity of diversion works.....  
Capacity of storage reservoir.....  
State quantity of water used each month in gallons or acre-feet  
Year Jan. Feb. Mar. Apr. May June July Aug. Sept. Oct. Nov. Dec. Total Annual  
.....  
..... 26ac 26ac 26ac 26ac 26ac .....

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.  
.....  
..... 80 Head Cattle .....

Maximum annual water use in recent years..... 78 ac ft ..... gallons  
Minimum annual water use in recent years..... 78 ac ft ..... gallons  
Type of diversion facility: gravity ☒, pump.....  
Method of measurement: weir....., flume....., electric power meter....., water meter....., estimate ☒

F. Purpose of use (what water is being used for)..... Hay, Pasture and Livestock water

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)  
..... NE $\frac{1}{4}$  of NE $\frac{1}{4}$  Sec 12 T24N R9E .....

H. Year of first use as nearly as known..... 1877

I. Name of person filing statement.....  
Position..... Organization.....  
Address..... 25 NVALELO

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.  
Date signed..... 6/25/67 ..... Signature..... A. P. Bressiani
